

THE AUSTIN F. OKIE WATERSHED SOCIETY

Austin Okie's vision and generosity have helped ensure that pristine nature is part of life in our watershed for generations to come. Through this work, he has furthered the Center's mission to **protect, restore, and preserve** our Inland Bays.

The **Austin F. Okie Watershed Society** recognizes people who have helped ensure the Center's lasting support for the watershed and its inhabitants through a bequest, other planned gift, or lifetime contributions of **\$50,000 or more.**

In thanks for their generosity, this select group of donors will **receive invitations to special events and recognition in Center publications.** All requests to remain anonymous will of course be honored.

"This is a very special place we call home, and **I feel a strong responsibility to protect our unique bays and wildlife.** My hope for the future is that many, many more people will support the Center for the Inland Bays' efforts to protect and restore them."
